PROFESSIONAL SUMMARY

Application Support and Cloud Operations professional with experience supporting enterprise applications, monitoring production environments, troubleshooting incidents, and coordinating with development and infrastructure teams. Hands-on exposure to AWS, Google Cloud Platform, Linux, SQL, Grafana, Prometheus, New Relic, ServiceNow, Jira, and API testing. Holds a BE in Robotics & Artificial Intelligence and brings additional learning in Python, Flutter, AI creation, robotics, and CNC programming. Interested in application support, technical support, cloud operations, and entry-level development or associate roles.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3), Google Cloud Platform (GCP), Linux administration, container basics

Monitoring & Observability: Grafana, Prometheus, New Relic, Google Cloud Monitoring & Logging

Programming & Web: Python, C, C++, HTML, CSS

Databases: MongoDB, MySQL, Oracle SQL

IT Operations & Support: Production support, incident and change management, alert/ticket management, troubleshooting, root cause analysis

Tools & API: ServiceNow, Jira, HPE Service Manager, Git, GitHub, Postman API testing, Apache Kafka

Additional: AI Ops basics, automation fundamentals, API/microservices basics

PROFESSIONAL EXPERIENCE

Application Support L2 – Engineering Operations

Uniserved Technologies Ltd | Client: Jio Platforms Limited | Navi Mumbai, India | Aug 2025 – Present

- Monitor enterprise applications and infrastructure using Grafana, Prometheus, New Relic, and Google Cloud Monitoring.
- Troubleshoot production issues involving applications, Linux servers, databases, and cloud environments.
- Manage incidents, alerts, tickets, and service-restoration activities in a production support environment.
- Support business-critical payment gateway, checkout, and order-management modules.
- Perform initial root-cause analysis and coordinate with development and infrastructure teams to resolve issues.
- Use AWS, GCP, SQL databases, Postman, and observability tools as part of day-to-day support activities.

PROJECTS

Money Tracker Web Application

- Built an expense-tracking application using MongoDB and web technologies.
- Implemented budgeting and transaction-management features.

AWS Website Hosting

- Hosted static websites using Amazon S3 and practiced deployment using EC2.

Python Utility Projects

- Created small Python applications, including a password generator and a quiz game.

EDUCATION

Bachelor of Engineering (BE), Robotics & Artificial Intelligence

Priyadarshini College of Engineering, Nagpur | Graduated 2025

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- OpenWeaver – AI Creation Workshop
- Google Developer Club – Flutter Workshop/Participation Certificate
- Python Internship – Technex, IIT (BHU) Varanasi, through EI Systems
- Robotics Programming Certification – VNIT
- CNC Programming Certification – VR Jamdars / Siemens Centre, Nagpur
- Google Data Analytics Professional Certificate – In Progress
